

Brain Research Institute

Monday Seminar

HS 2010

Lecture theatre 35F32, 12:30pm

20 September 2010 Host: M. Schwab	Martin Lotze Baltic Imaging Centre, University of Greifswald	Experiments with fMRI and TMS on motor plasticity
27 September 2010 Host: P. Molina-Luna	Alessandro Treves SISSA- Cognitive Neuroscience, Italy	Attractor dynamics in perception and memory: not easily seen, but felt
4 October 2010 Host: O. Raineteau	Adi Mizrahi The Hebrew University of Jerusalem	A new look (and smell) onto plasticity in the auditory cortex of lactating mothers
11 October 2010 Host: F. Helmchen	Anton Sirota CIN, Tübingen	Global and local oscillations in cortical circuits.
18 October 2010 Host: O. Raineteau	Prof Arthur Butt University of Portsmouth	Axon-glia signalling in CNS white matter
25 October 2010 Host: A. Gundlfinger	Peter Jonas Physiologisches Institut Albert Ludwig Universität Freiburg	The output synapses of fast-spiking, parvalbumin-expressing interneurons
1 November 2010 Host: U. Gerber	Francesco Ferraguti Innsbruck Medical University	Metabotropic glutamate receptors in fear learning
8 November 2010 Host: MSchwab	Frank Bradke MPI for Neurobiology Martinsried/Munich	Intracellular Mechanisms of Axonal Growth and Regeneration
Neuroscience Meeting		
22 November 2010 Host: I. Mansuy	Ruth Luthi-Carter EPFL	Transcriptomic approaches to understand and treat Huntington's disease
29 November 2010 Host: K. Gapp	Minoo Rassoulzadegan INSERM, Université de Nice-Sophia Antipolis	Sperm RNAs: epigenetic heredity and early development
6 December 2010 Host: M.Schwab	Lars Olson Karolinska Inst. Stockholm	On Nogo receptor regulation and the formation of lasting memories
13 December 2010 Host: I. Mansuy	Brigitte Kieffer CNRS Strasbourg	Opioid receptors and gene functions
